

MOBA REMOTE SOLUTIONS

MONITORING YOUR EQUIPMENT & PROCESSES,
SUPPLIER QUALITY AND EFFICIENCY

Our machines are constructed in such a way that you are able to easily connect with your equipment. You are able to remotely operate your equipment, as if you were at the location. All you have to do is connect from a desktop computer, tablet or smartphone and from any location.

iMoba, turning data into value

iMoba is a cloud service especially designed for egg producers producing and grading thousands of eggs. iMoba offer instant insights on a management level. Information is shown in simple to read graphs and overviews and can be viewed on any smartphone, tablet or computer as the system is completely web based.
